SandMaster™

With its compact footprint, large capacity and pneumatic conveyance, Cyclonaire's SandMaster provides clean, efficient traction sand delivery directly to locomotive sandboxes.

Keep Sand Flowing with Greater Efficiency

- **Service Two Boxes with One Unit**—Two-wand configuration of the SandMaster makes it possible to service both the fore and aft boxes without moving the unit.
- **Remote Operation**—Convey lines can be extended to remote points eliminating the need to spot locomotive sandboxes.
- **No Installation Required**—The SandMaster arrives at your site completely assembled, including the Cyclonaire dense phase pneumatic conveyor.
- **Automated**—Fully automatic operation controlled from the locomotive deck.
- **Simplified Delivery**—Compact, ground-based design; no top access required.

Get all the Benefits of a Distributed System without all the Cost

- Self-contained, single-position sanding station includes the Cyclonaire dense phase pneumatic conveyor
- Storage capacity is large enough to receive a full transport load of sand (normally 25 tons)
- Delivers sand through a single or optional dual wand
- Two-wand configuration makes it possible to service both the fore and aft boxes without moving the unit
- Convey lines can be extended to remote points eliminating the need to spot locomotive sandboxes
- Includes automatic shutoff to ensure filling accuracy and prevent spills
- Requires 220-volt, single-phase power, 50 cfm at 100 psig

Cyclonaire's SandMaster arrives completely assembled, ready to safely and efficiently deliver traction sand directly to the locomotive sandboxes.
