# Batch Weigh Hoppers

Boosting productivity demands precise batch weighing and system integration flexibility. Cyclonaire batch weigh hoppers are unrivaled in the industry for delivering pinpoint accuracy. Plus, they can be filled by screw feeder, air slide or rotary valve.

## Achieving Higher Quality is Automatic

**Greater Accuracy**—Automated operation delivers pinpoint accuracy in weighing and batching.

**Keep it Moving**—A 67° stainless steel cone with 2B finish produces a better product flow and eliminates product hang-up.

## Increase Productivity with Accurate Weighing and System Flexibility

- Achieve accurate batch weigh-ups: (0.1-lb accuracy)
- Typical batch sizes are fed to the mixer in under 20 seconds
- Remotely operated test weights for periodic load cell testing
- Includes Vibra-pad aeration and impactor for complete hopper cleanout
- Can vent to central plant dust collection or use a local mounted bin vent

*Cyclonaire batch weigh hoppers are engineered with flexible isolation joints to minimize outside forces that can affect weighing.*
